Development of technical codes

The Communications and Multimedia Act 1998 ('the Act') provides for Technical Standards Forum designated under section 184 of the Act or the Malaysian Communications and Multimedia Commission ('the Commission') to prepare a technical code. The technical code prepared pursuant to section 185 of the Act shall consist of, at least, the requirement for network interoperability and the promotion of safety of network facilities.

Section 96 of the Act also provides for the Commission to determine a technical code in accordance with section 55 of the Act if the technical code is not developed under an applicable provision of the Act and it is unlikely to be developed by the Technical Standards Forum within a reasonable time.

In exercise of the power conferred by section 184 of the Act, the Commission has designated the Malaysian Technical Standards Forum Bhd ('MTSFB') as a Technical Standards Forum which is obligated, among others, to prepare the technical code under section 185 of the Act.

A technical code prepared in accordance with section 185 shall not be effective until it is registered by the Commission pursuant to section 95 of the Act.

For further information on the technical code, please contact:

Committee representation

This technical code was developed by the 5G Equipment Sub Working Group under the Fixed and Wireless Terminal Working Group of the Malaysian Technical Standards Forum Bhd (MTSFB), which consists of representatives from the following organisations:

Digi Telecommunications Sdn Bhd
edotco Malaysia Sdn Bhd
Huawei Technologies (Malaysia) Sdn Bhd
Maxis Broadband Sdn Bhd
Redsun Engineering Sdn Bhd
Rohde & Schwarz Malaysia Sdn Bhd
SIRIM Berhad
Sony EMCS Malaysia Sdn Bhd
Telekom Malaysia Bhd
U Mobile Sdn Bhd
Webe Digital Sdn Bhd
Wideminds Pte Ltd
YTL Communications Sdn Bhd
Foreword

This technical code for the IMT-2020 (Fifth Generation) - Base Station ('this Technical Code') was developed pursuant to section 185 of the Act 588 by the Malaysian Technical Standards Forum Bhd ('MTSFB') via its Wireless Terminal Working Group.

This Technical Code was developed for the purpose of certifying communications equipment under the Communications and Multimedia (Technical Standards) Regulations 2000.

This Technical Code shall continue to be valid and effective from the date of its registration until it is replaced or revoked.
IMT-2020 (FIFTH GENERATION) - BASE STATION

1. Scope

This technical code specifies the minimum requirements for Base Station (BS) that are intended for use in IMT-2020 mobile telecommunications systems in Malaysia.

This Technical Code applies to IMT-2020 (Fifth Generation) Base Station (5G BS) based on the technologies as specified in applicable Malaysian Standards, technical codes, international standards, ITU Recommendations and its radio regulations as agreed and adopted by Malaysia.

2. Normative references

The following normative references are indispensable for the application of this Technical Code. For dated references, only the edition cited applies. For undated references, the latest edition of the normative references (including any amendments) applies.

See Annex A.

4. Requirements

4.1 General requirements

4.1.1 Power supply

If the 5G BS is equipped with power supply, the Alternating Current (AC) adaptor or rectifier for 5G BS shall not affect the capability of the equipment to meet this specification. The operating voltage shall be 240 V ± 5 % - 10 % and the frequency of 50 Hz ± 1 % for single phase equipment and 415 V ± 5 % - 10 % and the frequency of 50 Hz ± 1 % for 3-phase equipment as according to MS 406 or MS IEC 60038 whichever is current.

Adaptor shall be pre-approved by the relevant regulatory body before being used with the equipment.

4.1.2 Power supply cord and mains plug

If the 5G BS is equipped with power supply cord and mains plug, the equipment shall be fitted with a suitable and appropriately approved power supply cord and mains plug. The power supply cord and mains plug are regulated products and shall be pre-approved by the relevant regulatory body with the following requirements before being used with the equipment:

a) The power supply cord shall be certified according to:
   i) MS 2112-5 or BS EN 50525-2-11 or IEC 60227-5 (for Polyvinyl Chloride (PVC) insulated flexible cables/cords); or
   ii) MS 2127-4 or IEC 60245-1 (for rubber insulated - flexible cables/cords).

b) The mains plug shall be certified according to:
   i) MS 589-1 or BS 1363 (for 13 A, fused plug); or
   ii) MS 1577 (for 15 A, fused plugs); or
   iii) MS 1578 or BS EN 50075 (for 2.5 A, 250 V, flat non-rewireable two-pole plugs with cord for the connection of class II equipment).

4.1.3 Marking

The 5G BS shall be marked with the following information:

a) supplier/manufacturer’s name or identification mark;

b) supplier/manufacturer’s model or type reference; and

c) other markings as required by the relevant standards.

The markings shall be legible, inedible and readily visible. All information on the marking shall be either in Bahasa Melayu or English Language.
4.2 Technical requirements

The 5G BS shall comply with the following requirements:

a) Radio Frequency (RF);

b) Electromagnetic Compatibility (EMC); and

c) Safety and health requirements.

4.2.1 Radio Frequency (RF)

The 5G BS shall operate in any of the following frequency bands as defined in Table 1.

**Table 1. Operating band plans**

<table>
<thead>
<tr>
<th>No</th>
<th>Frequency (MHz)</th>
<th>Duplex mode</th>
<th>Operating band</th>

<td>26 500 - 28 100</td>
<td></td>
</tr>
</tbody>
</table>

Notwithstanding the mentioned bands above in Table 1, 5G BS may operate in other existing frequency bands identified for the International Mobile Telecommunications (IMT) Systems as specified in the Spectrum Plan and relevant Standard Radio System Plan (SRSP)s. The frequency bands are listed in Annex B.

4.2.1.1 Conformity

Depending on the technology supported by the base station, the 5G BS shall comply with the frequency bands stated in Table 1 and the requirements of one or more of the standards as defined in item (a), (b) or (c) of Table 2.

The 5G BS shall comply with the minimum parameters of the above standards as specified in Annex C.

If the 5G BS supports technologies other than 5G, for example Long Term Evolution (LTE), Universal Mobile Telecommunications Service (UMTS) and Global System for Mobile Communications (GSM)/Enhanced Data GSM Environment (EDGE) suppliers shall demonstrate that the 5G BS has been tested and certified for conformance to related Technical Codes or Class Assignments.

In the case of 5G BS support multiple network modes, the priority shall be configured to 5G followed by LTE, UMTS, and/or GSM/EDGE.

4.2.2 Electromagnetic Compatibility (EMC)

The 5G BS shall comply with the EMC emission requirements as defined in ETSI TS 138 113 or any equivalent standards.

4.2.3 Safety and health

4.2.3.1 Electrical safety and health

The 5G BS shall comply with the electrical safety requirements defined in MS IEC 60950-1, IEC 60950-22, IEC 62368-1 or any equivalent standards.

Annex C
(normative)

Minimum parameters for Radio Frequency (RF) conformity

The detailed parameters for RF conformity are as follows:

a) base station output power;

b) Adjacent Channel Leakage Ratio (ACLR);

c) operating band unwanted emission;

d) transmitter spurious emission; and

e) receiver spurious emission.
