

## NOTICE

### **PUBLIC CONSULTATION ON THE WIRELESS LOCAL AREA NETWORK (WLAN) IN THE 6 GHz FREQUENCY BAND**

- Feedback sought on the potential use of the 6 GHz frequency band for WLAN in Malaysia
- Submission of responses by 11 October 2021 (5:00 PM, Monday)

The Malaysian Communications and Multimedia Commission ("MCMC") has commenced a Public Consultation on the Wireless Local Area Network ("WLAN") in the 6 GHz frequency band, from **12 August 2021 to 11 October 2021**.

Given the global interest of WLAN devices operating in the 6 GHz frequency band, the MCMC is investigating the potential use of this frequency band for WLAN in Malaysia under the Class Assignment, taking into consideration the critical role of the wireless ecosystem and the level of interest in this frequency band.

In this Public Consultation, MCMC invites industry participants, interested parties and members of the public to provide recommendations, opinions and comments regarding the need for technical and regulatory frameworks that allow efficient management of the radio spectrum while facilitating the development and introduction of new technologies and application of WLAN.
