Subject: Public Consultation – Proposed Malaysia's Position for World Radio Communication Conference 2019 (WRC-19) Agenda Items

Dear Chairman,

SES S.A. ("SES") hereby submits its view on the above-referenced public consultation – see attached.

SES is a leading global satellite operator with over 50 satellites in geostationary orbit (GEO), including the NSS-9, NSS-12, SES-7, SES-8, SES-9, and recently launched SES-12 satellites operating in the C-, Ku- and Ka-band frequencies with coverage of Malaysia. SES also operates the innovative O3b constellation of twenty high-throughput Ka-band satellites in medium Earth orbit (MEO). With its unique combination of GEO and MEO assets, SES offers a full range of satellite solutions to broadcasters, cable and satellite TV providers, telecommunications and mobile network operators, as well as to governments and private enterprises, including in the aeronautical, banking, maritime, energy & resources sectors.

As a result, SES is vitally interested in the WRC-19 Agenda Items that may affect its current and future operations. SES is also a member of the Global Satellite Coalition.

Yours sincerely,

Daniel C.H. Mah
Vice President, Legal & Regulatory, EMEA & APAC
