

## NOTICE

### **MCMC NSC Advisory – Important Google Chrome Security Update (CVE-2026-1862)**

**CYBERJAYA, 10 FEBRUARY 2026** – The Malaysian Communications and Multimedia Commission (MCMC) wishes to inform the public of an important security update for Google Chrome, a widely used internet browser.

A vulnerability, identified as CVE-2026-1862, was found in the browser's core engine. This issue has been classified as high severity.

Devices that are not updated may be exposed to the following security risks:

- Unauthorised or malicious activity originating from web content
- Compromise of browser processes or data
- Potential exposure of personal or sensitive information

#### **What Users Should Do**

MCMC strongly advises users to:

- Update Google Chrome to the latest version (144.0.7559.132 or later)
- Ensure automatic updates are enabled where possible
- Only install browser updates from official sources
- Restart browsers after applying updates
- Remain alert for unusual behaviour when browsing

MCMC encourages all users to keep their software up to date and to rely only on information from official sources.
